School Readiness Survey February 2024

To understand what school readiness looked like in the September 2023 Reception cohort, we conducted focus groups and surveyed over 1,000 teachers and 1,000 parents of Reception children.

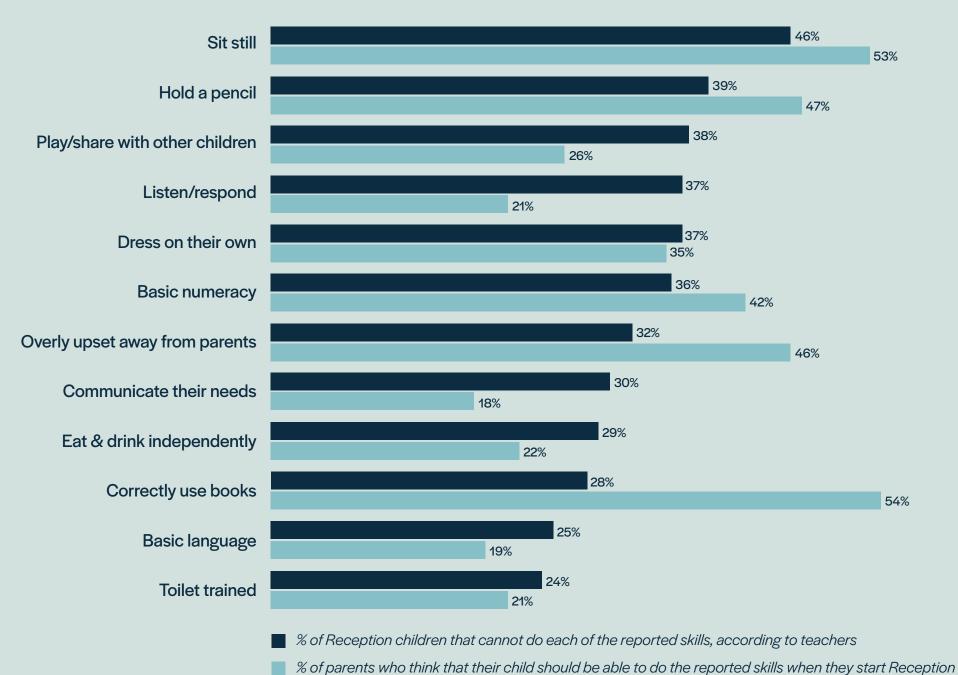

This research was conducted by Savanta on behalf of Kindred².

Perceptions of school readiness

50%

of school staff say the school readiness problem is worse than in September 2022

A look at toilet training

1 in 4 children

starting Reception class are not toilet trained, according to teachers

one child in a 2023 Reception class who is not toilet trained

90% of school staff report at least

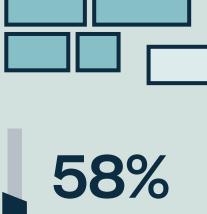

their sole responsibility to toilet train their child

Lack of school readiness affects all children

93% of teachers say that their school is

to manage the school readiness issue

28% of teachers report that

increasing or reallocating resources

stress levels are up.

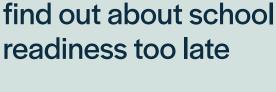

22%

a health visitor

of parents say they've

never had a visit from

Too little, too late: the information gap

of parents say they

69% 目 43%

of teachers say that

staff morale is down

more guidance

of school staff think

parents should receive

Around half

access to affordable (54%) and high quality (45%) childcare would improve school readiness

of parents think more

Why aren't children ready for school?

parents say their child

was ready for school

when they started

Reception

What school staff think TOP 5 59% Parents not reading to children 58% Parents spending more time on electronic devices than with children 56%

53% Parents don't think school readiness is

Less time spend in early childhood education

Children spending 2+ hours a day on

electronic devices

their responsibility

54% Parents don't think school readiness is their responsibility

TOP 5

51% Parents spending more time on electronic

devices than with children

What parents think

50% Children having less interaction with other children

50%
